DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on June 23, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application SN 10/859,982 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 1-69 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest an optical system used in an optical pickup having a chromatic aberration correcting element with ring-shaped zonal structure and an objective lens that converges a light flux from the chromatic aberration correcting element onto an information recording plane of an optical disk where the ring-shaped zonal structure of the chromatic aberration correcting element corrects a deviation of a focal point caused by the objective lens due to wavelength fluctuations of an incident light flux and the ring-shaped zonal structure of the objective lens corrects spherical aberration caused by the objective lens due to wavelength fluctuation of an incident light flux.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
